Print specification required by CMYKGrafix

Digital file guide lines.

Acceptable files.

Adobe photoshop, Adobe illustrator, Corel draw,

Unacceptable files.

Adobe Page Maker, Adobe Indesign, Power Point, Macromedia Freehand, Microsoft Publisher, CAD files, Microsoft Word, Quark Xpress 6.0

Acceptable file types.

Raster file with the extension. .jpg, .tiff, .Psd, .Gif

Vector preferred

.eps, .ai, .pdf

Note Vector files in digital printing industry are preferred and are mostly used within the large format printing.

Acceptable but not preferred.

.Jpg, .pdf, .gif

Fonts

Please supply your fonts when collecting for output or select your text and create outlines.

Outlined fonts in Illustrator or rastered type in photoshop are preferred.

Color Management.

Please use the pantone matching system (PMS) whenever possible in order to achieve the best color matching with your file.

UNDERSTAND that color is device dependent and the same PMS color will look different depending on what printer and media is used.

Please note that we use a 6 color process and some PMS colors are impossible to match.

Print Ready FILES

Must be supplied full scale or proportional to the output. Please don't send art that is smaller than 1:20 scale.

Files are preferred to have PMS numbers in the file.

Must have fonts included or outlined.
